I have over 15 years of working experience on computer programming, front end development, web development, scripting, web services development and databases. Proficient in translating designs and wireframes into high-quality code, and writing application interface code via JavaScript and ReactJS workflows. Expert at monitoring and maintaining frontend performance and troubleshooting & debugging to help boost performance. I have a proven track record and have demonstrated many successes within the areas of planning, designing, and implementing various information systems and IT solutions.

EDUCATION

M. S., Computer Science.
B. Tech., Computer Science.
