PROJECT :-

- **Retail Inventory Management(RIM)**

Duration: 90 days

Technology used: Java,J2SE, MYSQL

- **TEAM SIZE:** 1to3.

This software system can be used for tracking inventory levels, orders, sales and deliveries. It can also be used in the manufacturing industry to create a work order, bill of materials and other production-related documents. Companies use inventory management software to avoid product overstock and outages. It is a tool for organizing inventory data that before was generally stored in hard-copy form or in spreadsheets.
